

INFRA:

- We provide solutions for water transmission, distribution, and sewage solutions, catering customers with design services to optimise consumption of products to reduce footprint
- Offering a range of custom solutions for water and gas management through a diversified portfolio of pipes, fittings, joints and adhesives as well as sustainable rainwater management systems that include channel drains, sewage and public resource management infrastructure

PVC-O PIPES FOR WATER DISTRIBUTION

High Pressure
Resistant

Impact
Resistance

Higher Hydraulic
Capacity

Corrosion
Resistance

Ease of
Installation

Unaltered
Water Quality

ELEVATE YOUR PROJECTS WITH ashirvad dynaflo!

As India's influence grows on the global stage, so does the need for infrastructure that stands strong amidst challenging conditions. A steadfast foundation is essential for our nation's progress, and at Ashirvad, we are committed to shaping the future with innovative solutions. Introducing ashirvad **dynaflo** from house of Ashirvad – a revolution in water transimission piping systems designed to overcome the challenges with conventional system.

PVC-O CLASS 500

(as per IS 16647 : 2017) 6 meter – HSN CODE : 39172390

Size (mm)	PN (Kg)	Design co- efficient (C)	Part No.	MRP ₹ Per Pipe
